Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant clarified the nature of the invention as a gelatin capsule with a liquid core having a sugar coating. The shell is thin and the capsule is readily dissolved in the mouth. It was suggested applicant amend the claims to adequately reflect clarification, as the current claim language is unclear. Applicant further stated the Stapler reference is very broad and does not provide any direction for the preparation of the disclosed capsules resulting in the need for undue experimentation in order to arrive at the instant claims..
